PLASTIC SURGERY

DESCRIPTION

PEPTIDE STACK BEYOND HEAL BPC-157 supports tissue repair, inflammation balance, and gut health, while TB-500 supports cellular regeneration, mobility, and muscle recovery. Used together as part of a structured protocol, these peptides support the body's natural healing and recovery processes. Injection Site: Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
