

PEPTIDE

SEMAGLUTIDE

Ocean
PLASTIC SURGERY

DESCRIPTION

Semaglutide is a GLP-1 receptor agonist used for weight management and metabolic support. It mimics a natural hormone that helps regulate appetite and blood sugar, supporting sustainable weight loss when combined with lifestyle changes.

SEMAGLUTIDE

Per prescription

99% PURITY

BENEFITS

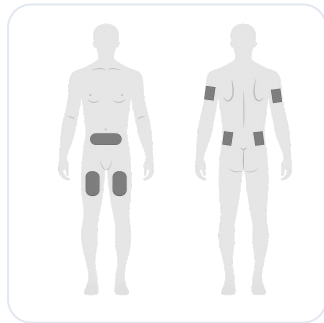

Supports appetite control, blood sugar balance, and weight management goals on your personalized plan.

SIDE EFFECTS

Follow dose instructions as listed. Nausea, injection site reactions, or digestive discomfort may occur, especially when starting or increasing dose. Contact our medical team if symptoms are severe.

IMPORTANT

-  **Follow your prescribed titration schedule**
Cycle
-  **AM or PM, be consistent**
Timing
-  **Once per week unless directed otherwise**
Frequency
-  **See dose instructions on your plan**
Dose / route
-  **Refrigerate**
Storage

INJECTION SITE

Use an alcohol swab on the top of the vial and at the site of injection before use. Work in a clockwise fashion around the belly button to ensure the prior injection sites have healed, avoiding tender areas. Other subcutaneous area shown to the left.
