SIDE EFFECTS

It is

and let the medical team know.

Cycle

injection before use. Work in a clockwise fashion around

Timing

Refrigerate

Frequency

10 days or 1-3 Months ON 1

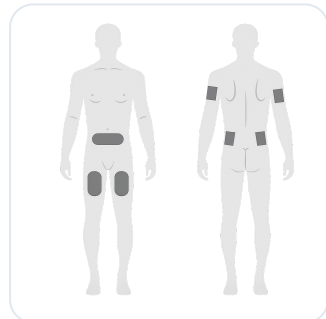

Dose / route

Month OFF

Storage

IMPORTANT

INJECTION SITE

Thymosin Alpha 1 (Tα1) is a naturally occurring peptide that supports immune regulation and balance. It helps enhance T-cell function, supports immune resilience, and assists the body in managing inflammation and recovery, especially during periods of immune stress.
